

SPONSOR & EXHIBITOR INFORMATION

From September 6-7, 2021, the sixth edition of “*Swiss e-Print: The Swiss Conference on Printed Electronics and Functional Materials*” will be held in Buchs, Switzerland at the campus of the Eastern Switzerland University of Applied Sciences (OST). The event is co-organized by the OST, iPrint, EPFL-IMT, the CSEM, Empa and the FSRM as an event of the Swiss Microtechnology Network.

Following the success of the first five editions (approximately 120 participants each), the 6th edition of the conference will follow a similar 2-day program. The congress will comprise invited lectures of international key people in the field with contributed papers from Swiss participants. As well, authors will be given the opportunity to emphasize the substance of their work during a dedicated poster session. Ample time will be available during the conference for discussing results and new ideas. The OST campus and the city of Buchs will offer an attractive meeting place, where new and important achievements can be discussed. We are expecting 100-120 participants for this 2021 edition.

Given the actual COVID-19 situation we realise that not all participants will be able to travel to Buchs. Therefore, we are currently examining various possibilities to also allow remote participation. At this time we can say that there will be a "hybrid" solution so that participants can at least partially join remotely. More details will follow.

The following possibilities exist for companies that wish to increase their visibility at Swiss e-Print.
(7.7 % VAT not included)

CHF 5'000 - “SPONSOR”

- **3 full participant** entries to the conference, including social events, lunches and coffee breaks
- **1 table** for brochures or product display (**max. 2 x 4 m area**) with 1 x 220 VAC electricity
