

SPONSOR & EXHIBITOR INFORMATION

From September 25-26, 2024, the 7th edition of “*Swiss e-Print: The Swiss Conference on Printed Electronics and Functional Materials*” will be held in Dübendorf, Switzerland at the campus of Empa (Swiss Federal Laboratories for Materials Science and Technology). The event is co-organized by Empa, CSEM, iPrint, inspire AG, EPFL-IMT, OST and the FSRM as an event of the Swiss Microtechnology Network.

Following the success of the first 6 editions (approximately 120 participants each), the 7th edition of the conference will follow a similar 2-day program. The congress will comprise **invited lectures** of international key people in the field with contributed papers from Swiss participants. As well, authors will be given the opportunity to emphasize the substance of their work during a dedicated **poster session**. Ample time will be available during the conference for discussing **results and new ideas**. The *Empa Akademie* facility will offer an attractive and accessible meeting place, where new and important achievements can be discussed. We are expecting 100-120 participants for this 2024 edition.

Swiss ePrint 2024 will take place in the traditional format as an **in-person meeting**. We are looking forward to seeing you in-person in Dübendorf in September 2024.

Table top booth at Swiss ePrint 2022

The following page lists the possibilities for companies that wish to increase their visibility and exhibit at Swiss e-Print. **Please note that for the 2024 edition the exhibition space is very limited. Exhibitors must respect the allocated space of 2m x 2m.**
